PROFILE

Information Systems student at Universitas Pembangunan Nasional "Veteran" Jawa Timur with experience in UI/UX design, web development, and information systems projects. Familiar with designing user interfaces, developing responsive web applications, and working with relational databases. Experienced in collaborating on technology projects through academic programs and professional internships. Interested in exploring practical applications of information systems and technology.

EDUCATION HISTORY

Universitas Pembangunan Nasional "Veteran" Jawa Timur 2023 - Now

- S1 Information System | IPK: 3.66 / 4.00

SMK Negeri 1 Surabaya 2020 – 2023

WORK EXPERIENCE

Information Technology Intern, Kantor Otoritas Bandar Udara Wilayah III Surabaya Feb 2026 – June 2026

- Contributed to the development of LENTERA (Layanan Evaluasi dan Monitoring Training Penerbangan), an information system for monitoring and evaluating aviation training.
- Worked on dashboard development and system functionality to support employee training data management and monitoring.
- Implemented database queries and data processing using SQL and MySQL.
- Participated in system testing, debugging, and implementation activities.

UI/UX Designer Intern, PT VINIX SEVEN AURUM Aug 2025 – Dec 2025

- Designed aesthetic and functional User Interfaces (UI) for web using Figma, focusing on optimal user experience.
- Translated visual designs into live, responsive websites using HTML, CSS, and Webflow, ensuring pixel-perfect implementation across devices.
- Collaborated closely with the development team to align technical implementation with design specifications.

Computer Technician Intern, ABAS COMPUTER Oct 2021 – March 2022

- Diagnosed and repaired computer hardware/software issues to ensure optimal client operations.
- Provided direct technical support to customers, resolving problems with a focus on service excellence.

KEY PROJECTS

AlgoTerminal – Real-time Crypto Analytics | Link Jan 2026

Real-Time Crypto Dashboard with Custom Technical Indicators and Hybrid Watchlist Sync

- Built a professional-grade crypto trading dashboard featuring real-time price updates via CoinGecko API.
- Implemented a hybrid watchlist system supporting both local storage (Guest) and Supabase database (Auth Users).
- Developed custom algorithms for technical indicators (EMA/SMA) using TypeScript.

Uangku - RPG Finance Tracker | Link Jan 2026

Gamified Personal Finance Tracker with RPG Mechanics and Dark Pixel Theme

- Gamified personal finance management by implementing RPG mechanics (Income as 'Loot', Expense as 'Damage').
- Engineered a secure CRUD system with Native PHP and optimized MySQL database structure.
- Designed a responsive "Dark Pixel" theme with interactive Chart.js visualizations for budget tracking.

AlgoDesign – Fintech Agency Simulation | Link Jan 2026

High-Fidelity Fintech Agency Simulation with Client-Side Persistence and Advanced DOM Manipulation

- Simulated a high-fidelity agency website featuring complex client-to-admin workflows without frameworks.
- Implemented client-side data persistence using LocalStorage and Base64 image processing for transaction proofs.
- Created immersive micro-interactions and scroll-triggered animations using pure CSS and JavaScript.

ADDITIONAL EXPERIENCE

WebSpire – Digital Web Agency | Link — Oct 2025 – Nov 2025

Final Project at VINIX7 Internship

- Developed a fully responsive and SEO-friendly website for a digital agency, featuring a client booking form and payment upload system.
- Implemented a functional admin dashboard to manage incoming requests and site content.
- Collaborated with a team to ensure the site met professional design standards and cross-browser compatibility.

Research Collaboration – User Study — Feb 2025 – June 2025

Analysis of User Satisfaction of the Ajaib Alpha Application Using the EUCS Model and SEM-PLS

- Worked in a group to collect and process over 400 survey responses.
- Supported teammates in analyzing results, maintaining accuracy and efficiency.
- Strengthened problem-solving and teamwork skills through shared responsibilities.

SKILLS

- **Hard Skills**: UI/UX Design (Figma, Wireframing, Prototyping), Web Development (HTML, CSS, JavaScript, PHP), Database Management (MySQL, Supabase), SQL.
- **Soft Skills**: Analytical Problem Solving, Team Collaboration, Design Thinking, Time Management, Adaptability.
- **Languages**: Indonesian (Native), English (Intermediate).
